

## About us

PPH AMG Sp. z o. o. was founded in 1990. From the beginning of its existence our company has specialized in container production for vehicle transportation. Although we also take orders for many different kinds of steel construction. With regards to the number of containers and cisterns produced our firm is the largest of its kind in Poland. 90% of the products made by our company are sold to countries outside of Poland, such as: **Norway, Germany, Sweden, Denmark, Great Britain and Holland.** Each year our firm sees growth in number and worth of contracts, making it necessary to reorganize our work and continually enlarge our company.

PPH AMG Sp. z o. o. holds a "Certificate of Management Quality Systems ISO 9001:2000 and 14001:2004" which includes "Container production, steel bins and other steel construction". Our company first received this certificate in May of 2000. Our company also holds the right to produce liquid fuel tanks which was given to us by **SP Sverige Proxnings & Forsknings - Institut (Swedish institute for research and testing)**. Our company also holds a certificate and the authority to weld using **DNV (Det Norske Veritas)** for the production of containers for particular use on offshore platforms.

### Our company also produces:

- **Hooklift containers** complies with the requirements of SS-3021 standards or with the customers guideline, the capacity of the container is 10 - 49 m<sup>3</sup>.
- **Type "Open Lift"**, built according to SS-3020 standards with a capacity of 1 - 12 m<sup>3</sup>, while the thickness of the metal used varies according to the order.
- **Type "Combo"**, built according to DIN 30720 standards with a capacity between 2,5 - 12 m<sup>3</sup> while the thickness varies according to the demands of the client. The lids on these bins are equipped, however if the customer so pleases in steel, aluminum and PCV lids can be added.
- A wide variety of containers built in accordance to German standards **DIN30720 and DIN3072-1.**
- **Storage container** the length of 8 to 10 feet, adapted for vehicle transport or fork lifts and equipped with anti-leak double wing doors which ensure that no water will leak into the container.
- **Oil reservoirs** according to clients demands.

PPH AMG Sp. z o.o. from the beginning of its existence, has developed its business to best meet the needs and expectations of its clients. We are constantly introducing new innovations and pursuing investment (this includes the continuous weld, a replacement for the sand blaster, and the purchase of a new painting chamber) with the goal of not only appeasing consumers but to go much further than their expectations.

We promise our clients exceptional attention toward two basic parameters with regard to the products we offer: quality and price, and one of the basic advantages of PPH AMG is that we offer our clients advice with well-grounded, workable and modern solutions, which in turn improves the quality of their business.

## Hooklift Containers

### Area of use:

Intended for the storage, segregation and transportation of wastes and recyclable materials, build garbages, muddy soil, and other materials according to customer wish.

### Technical specification:

- the capacity of the container is 10 - 46 m<sup>3</sup>,
- frame according to SS, DIN and other standards,
- hook lift loading system,
- double door with a door locking and security blocking fitted on the side of the container,
- Light version: thickness of steel sheets bottom: 4mm; walls: 3mm, Frame span: 1500mm,
- Standard version: thickness of steel sheets bottom: 4mm; walls: 3mm, Frame span: 1250mm,
- Medium Version: thickness of steel sheets bottom: 4mm; walls: 3mm, Frame span: 750mm,
- Heavy Version: thickness of steel sheets bottom: 5mm; walls: 4mm, Frame span: 750mm,
- Version with side doors,
- "Hardox/ Domex" version or Hardox/ Hardox steel sheets

### Special Options:

- single door fitted with a security locking on the side of the container, top hinged rear door, also fitted with a rubber seal,
- mounted on an extended section or at level with the base of the container,
- door built on the side of the container,
- logo plate,
- ramp (in case the container is used for transportation of machines),
- roller cover,
- permanent roof,
- sliding roof slideable by hand,
- lifting roof lifted by a lifting break or a hydraulic pump,
- the forklift pockets under the containers
